

Fish Information

Minimum of 8' pond depth
Send for your DEC Permit

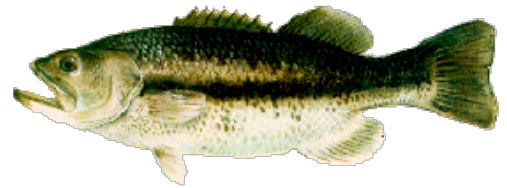

Trout -

- Up to 600 Trout/acre
- Need flowing water to reproduce
- Brook Trout grow to 10-12"; Rainbow Trout grow to 20-24" or 2-3 pounds
- Require bottom water temperature below 70°F
- Brook Trout are more aggressive feeders.

Largemouth Bass -

- 100 Bass/acre
- Bass like a soft bottom area and cover to breed and hide in (grass, cattails, weeds, etc.)
- Grow to 18-19" or 4-5 pounds
- Tolerate warmer water
- May need to stock minnows with bass for food, 300 minnows/acre

*****Largemouth Bass and Trout can be stocked together the first year, but older Largemouth Bass may eat Trout fingerlings.**

Catfish –

- 150 Catfish/ acre
- Co-habitat well with other fish
- Do not need flowing water to spawn, but like holes. Will not overpopulate
- Grow to 5 - 10 pounds.
- Tolerate wide range of water temperature. Temperature must exceed 70°F for 2-3 weeks in order to reproduce
- Will feed on Filamentous Algae and do not stir up the bottom.
